Announcing

our appointment as

Sole Distributors in Atlanta for Kelly-Springfield Tires

It affords us pleasure to announce that we have been appointed the sole distributors in Atlanta and vicinity for the well-known line of Kelly-Springfield Tires and Tubes.

We have secured what we consider the most convenient location in the city, the first two stores immediately South of the entrance in the Ivy Street Garage Building.

The first room, which is immediately on the garage entrance will be our display and sales room, the other is to be used as our vulcanizing and repair shop.

Our Stock

We will carry in stock for immediate sales and application the full line of Kelly-Springfield tires and tubes and will specialize on the Caterpillar and Avco-cose solids for trucks and other heavy duty.

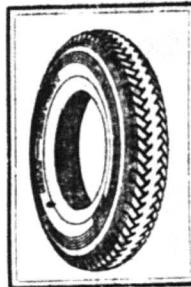

Our Line

The Kelly - Springfield line needs no introduction in this territory and we consider it sufficient to say that every tire in the house is brand-new, fresh stock—right from the Kelly-Springfield factory.

Our Manager

Our firm is headed by Mr. John H. Holland, one of the oldest tire men in point of service in the city, and under his supervision we intend to render a tire service in sales and repairs second to none.

Our Force

Our force has been recruited from the very best in this section, each man being carefully selected for his post with due regard for his ability, judgment and tactfulness.

New and modern vulcanizing machinery is being installed and in charge of skilled factory mechanics who will render service equal to the finest factory work, and our charges will be most reasonable.

ROAD SERVICE

We will maintain a fleet of fast service trucks, manned by competent, courteous men for your convenience.

TELEPHONE WA. 1262

VULCANIZING

Our repair department, with ample, competent help, will give you one-day service on most jobs.

TELEPHONE WA. 1262

All tires sold by us will be mounted free of charge and our new 300-ton hydraulic press now being installed will enable us to apply large truck tires with the least possible delay to truck owners.
