## Signal Jobs **Open** to All Students

The Signal, the College newspaper, has openings for reporters on the staff. Signal staff members may be enrolled in either Day or Evening classes.

All students who are interested working on the Signal should contact either Ron Hill or Rod Spicer, managing editor and editor respectively, at the Signal office in the Ivy street building. A short interview will place interested students on the staff. The Signal office will be open until 5 p.m. daily Monday through Friday. Students who attend night classes and who desire to work on the Signal may phone for an appointment which will be set up on the night you attend class.

Named Editors of Any student is eligible to work on the paper, regardless of his major. Contrary to some reports, students do not have to be majoring

# Statement of Signal Policy and Functions

Each year at the end of Spring Quarter a new editor and editorial staff is selected for the Signal. In the past few years the new editors have presented a statement of policy and function with their first edition of the Signal

In line with this procedure, as new editors of the Signal, we present the following statement of policy for the coming year.

Keeping in mind that the Signal is first. and foremost a student newspaper, we will at all times attempt to represent the opinions of the student body, and also serve the best interests of the faculty, administration and the collepe.

The editorial policy this year will again, as last year, be confined to comment on the local scene and on the college level. We believe the purpose of a college newspaper is to report and comment editorially on issues which are vital to the college. Comment on national and international problems will be purposely excluded from the Signal.

All material in the Signal will be treated as straight news and feature material presented objectively and impartially with the exception of signed columns and the editorial page where opinions and comments will be presented.

Two types of articles will appear on the editorial page, signed columns and unsigned editorials. Signed columns are written by staff members and reflect individual opinions not necessarily the same as the views of the Signal staff.

Unsigned editorials are written by the editorial board consisting of the editor, managing editor, and news editor.

The editor and the business manager of the Signal are selected by the Student Ac-

#### **Good Advisement Essential** To Beginning College Student

One of the most important steps any student takes before entering college or during the course of his college career is securing the services of a qualified counselor.

Most colleges have a system set up whereby each student is assigned an adviser or counselor. These advisors are supposed to answer students' questions and to guide the students' selection of courses so that the courses selected fit the degree program of the student.

Georgia State has an adivsement program but the present set-up does not provide the incoming student with the individual guidance he needs.

Under the present advisement system, the student is not assigned an advisor but rather he goes to the department he has chosen for a major and selects any faculty member who happens to be on duty. No appointment is set up and beacuse of the volume of students being processed the interview is often hurried.

In the course of his college career, it is not unusual for a student to have a half dozen advisors. This confuses the student because the advisors often differ in opinion as to what courses the student should take. In short, some of the faculty members now acting as advisors are not qualified to advise students. By this we mean some of these faculty members do not trouble themselves to check with the catalog and see what courses are required for a particular degree program.

tivities Committee from those students petitioning for the positions. Other editors and staff personnal are chosen by the editor.

The editor, managing editor and business manager currently receives tuition scholarships to the College. The advertising manager recives 15 percent commission on all local adds sold for the Signal. At present other signal staff members receive no monetary compensation. However, action is now being taken to increase the compensation to Signal staff members and a new compensation plan will be initiated in the Fall Quarter.

In the coming year, we will in every way possible strive to keep the student body informed and aware of the needs and the deeds of the college. Though several steps have been taken toward the proposed con- instead. Most college students get of work. struction of a multi purpose building which what they pay for when it comes will house a gymnasium and other much to material things. Not so regard- too. But they have learned their with his department head again to needed facilities, we will continue to re- ing education. mind the students and governmental officials of the urgency of immediate action toward construction of this building.

We believe the addition of a new gymnasium will greatly improve school spirit by affording a place for the entire student body to meet for assemblies and also by providing a home for the basketball team and other sports activities.

We will strive to improve school spirit by backing the sports program and other are a few students who try their student activities.

In conclusion, we make the same promise college career. Most students as last years editors. We will at all times however, settle for far less than try to keep the doors of the Signal open, the maximum available. both the physical and mental doors, so that all will have the right to express themselves a to an open mind.

#### Welcome, Transfer Students, Make Yourselves at Home The students at Georgia State College

will again be playing the role of hosts this but I do have some ideas why. summer. Transfer students from over 80 colleges throughout the United States are and for some time back have been enrolled here for the summer quarter.

The Signal wishes to extend for everyone connected with Georgia State a cordial welcome to each and every transfer student, new and old.

Make yourselves at home, transfers, and Quite the reverse, it cheats stu we hope than your association with Georgia dents of the important attitude State College, whether it be temporary or "I want all I can get; I need it. lasting, is a pleasant one.

Although many of the organizations are inactive this summer, the organizations that the American people also has satare active invite you to affilliate socially urated college students with the with them

Information concerning all organizations may be obtained at Dean of Students William M. Suttles' office on the second floor of the new building or at Assistant Dean of Students Nell H. Trotter's office, A-320 on the third floor of the new building.

In addition, the office of the Signal will be open each afternoon from 12:30 until 5:00, and any help that the staff can give will be gladly offered.

#### **Proposed Allocation of Funds**

Yet, I know other students who try their best to get even less than I do. Why? I don't know for sure, First, the high schools of today

dents as possible in order to "ge rid of them." This naturally does not form the proper attitude for getting the ultimate from college

THE SOCIALIST attitude of the cemetery. This is an attitude that kills initiative and ambition, resulting in lazy, "don't care" college students.

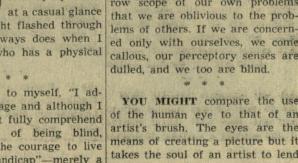

The American craving for quantity instead of quality is smothering creativeness and inquisitiveness in the incoming college students. This numerical binge is characterized by the labor leader's reply when asked what his union wonted: "More, more, more!"

# development of

planation for the dominant role that technology has over the humanities in this

country is immediately apparent. Early American settlers were

faced with the practical problems of survival. They had the perilous task of carving a civilization out

As a result many students find at a later date that they have taken courses which do not apply towards their degree program.

Whether or not the student receives proper guidance is of utmost importance. The obligation of an advisor or counselor is not one that should be discharged lightly.

Poor advisement can cause a student to become dissatisfied with college and -be come very discouraged.

The Signal suggests that a system be started whereby each student is assigned an advisor and further that appointments be arranged for the student to meet his advisor.

Getting off on the right foot is important to the student trying to orientate himself to college life.

By having an appointed avisor the student will have someone to whom he can go with his particular problems. The Signal believes that such an advisement system would be a great improvement over the present procedure.

#### Congratulations, Rampway \_ Staff, for A Job Well Done

The Signal would like to extend our congratulations and pass along the thanks of the student body to the Rampway for the excellent job they did on this year's Ramp-

Larger this year than at any time in the school's history, the Rampway does a thorough job of depicting student life at Georgia State.

In later years this year's Rampway will serve as the index of Georgia State's performance during the school year 1957-58. A year's activities and memories are brought to life in the pages of this year's annual.

The task of producing an annual involves a year's work and many of the students who helped to work on the Rampway received no monetary compensation what-so-ever. These students are to be commended for their effort.

This years Rampway contained 300 pages and contained additional color pages.

Again, congratulations Rampway staff, for a job well done.

sidering the needs of Georgia colleges, Raising the standards is not the which will be handling an expected 35% increase in enrollment in five years. In all the real answer lies in inspiring caused America to prove herself the report calls for \$48 million to be dis- the students to WANT to do in the world. persed among 16 units of the University better. System.

The Signal is glad to see that the Regents are planning for the future in expanding our states educational facilities but we can not help but question the proposed apportionment of the funds.

The resort calls for the University of Georgia to receive over four times as much money as Georgia State and for Georgia Tech to receive over three times as much money as Georgia State.

Take a look at the enrollment figures of the three colleges. There is little variation in the enrollment of the three. Why then, do we receive only a fourth as much money as Georgia and one third as much as Tech.

True we are not a campus college and as such do not require dormitories. But our different nature than Georgia or Georgia or "I'll do it later." Tech.

We have been forced to use facilities which have long ago been outmoded by our sister colleges Tech and Georgia.

A converted garage still houses a large part of our classrooms whereas Tech and Georgia students attend classes in more adequate structures.

We are thankful for the proposed \$4,000,-000 allocation as we are thankful for the addition of the degree programs and other advantages the Board of Regents have prepared and thus he fails. granted us recently.

However, we would like to be recognized on a more equal footing with Georgia and Georgia Tech.

We believe Georgia State College is on to going to the hospital to see the tasks, the big and the little, the and most useful colleges in the South. We hope that we will not be handicapped in this growth by lack of funds.

**Rampway Dedicated** To the School of Arts and Sciences The Rampway, student yearbook

at Georgia State College, was not dedicated to an individual this year.

Instead, it was dedicated to the School of Arts and Sciences, which luring the past school year was authorized by the Board of Regents of the University System of Georgia to begin Bachelor of Arts and Science degree programs-the former in January, 1958, and the latter in September, 1958.

The Regents also authorized a Master of Business Administration degree program, effective September, 1958. Hitherto the College had offered only a BBA degree.

The dedication quoted President Noah Langdale, Jr., as saying, 'These degrees pave the way for Georgia State College to be a truly metropolitan educational center. It also stated: "Now thousands of Georgians, who would have found it impossible before, can get a degree in Arts and Sciences, and many others will be able to continue their education in Business Administration on the graduate level.'

Cited for special mention in the dedication were Dean J. C. Horton Burch of the School of Arts and Sciences, President Langdale, and the Board of Regents.

Editor of the 1958 Rampway was

SIGMA KAPPA CHI SWEETHEART-Carolyn Reed, of Delta Zeta sorority, was elected sweetheart of Sigma Kappa Chi at the fraternity's Spring Formal. The formal was held at the Peachtree Gardens Club.

SAN parlayed the 10-strikeout pitching and 3-triple hitting of Vernon Huff, a 10th inning pinchhit single by Nick Miller and overall brisk, errorless fielding to take the upset victory.

AFTER PI ALPHA went ahead 4-3 in the top of the 10th inning, SAN led off the bottom of the 10th with Baxter Jones who waited out a walk. Shortstop Bill Doherty smashed a line single to center to keep SAN hopes alive.

Bill Britton, Pi Alpha pitcher who had not been beaten in the two-year history of IFC play, wildpitched the runners down to second and third while pitching to Don Mitcham, who eventually popped out to the catcher. Then the stage was set.

Ron Hill, SAN second-baseman and coach, called on Nick Miller to pinch-hit for Gene Powell, who had played a sparkling game afield at his third base slot. Miller took a called strike and then lined a looping single to left that scored Jones and Doherty, who had to slide under a rifle-like peg from Ken Webb, Pi Alpha left-fielder, who almost made a lunging catch of the hit.

This final game was nothing like the first Pi Alpha-SAN game except that they were both softball games. Pi Alpha walloped SAN 10-1 in the first game that put the two teams in a tie for records.

IN THE FINAL game, SAN made the difference.

got 12 hits compared to three in Back to the chiller. #### A Dynasty Is Broken By RON HILL

JULY 18, 1951

Signal Managing Editor

A dynasty has been broken. Pi Alpha has been beaten in a sports championship for the first time since the inception of Georgia State college, has been appointed director of edu- of the Interfraternity Council intramural sports program in the fall of 1956. From that fall until this summer, Pi Alpha had reigned as champions of football (twice), softball and basketball.

Sigma Alpha Nu ended the reign of supremacy last month in the championship 5-4 softball victory that took 10 tensionpacked innings. The details of the game are elsewhere on this sports page. The impact of the game is the important thing

Now other fraternities can see that the string is broken and take heart. The thought of playing perennial champions is sometimes devastating, a fact that the seven teams chasing the New York Yankees will testify to. Now, Pi Alpha has to start over and the other six fraternities will be on a more even footing.

Remember, Pi Alpha had been unbeaten in regulation inramural play until SAN took charge in that tense 10th inning last month. Only two forfeit losses had marred Pi Alpha's sports record in the past two years, which is quite an achievement anywhere.

The IFC sports program will be better because of SAN's win. Competition always makes for more interesting sporting contests and heart is a big part of competition.

In passing, here's a tip of the hat to Pi Alpha, which worked hard to build up this formidable record, and to Sigma Alpha Nu, which never gave up the fight and finally won the softball championship.

#### **IFC ALL-STAR SOFTBALL TEAM**

After watching all of the IFC teams play, my All-Star eam would consist of quite an array of softball players. In LAYTON HAS been active in fact, this team could probably hold its own in Class B, or maybe, A, in the Atlanta City League. At any rate, it would be quite a team.

Pi Alpha placed five men on the team, which signifies the type ball club they had. Sigma Alpha Nu placed two men, including one of two pitchers. Sigma Kappa Chi, Pi Kappa Phi, Tau Epsilon Pi and Alpha Epsilon Pi players took one spot each.

I would choose two pitchers: Vernon Huff, who was chosen nost valuable player by his Sigma Alpha Nu team mates, and Pi Alpha's Bill Britton, who has lost only one game in The National Association of two years of IFC play. The catcher would be Pi Alpha's Walter Fountain. He tops the field of catchers in hitting and is adept at fielding. SAN'S Keith McMahon gets the runnerup spot here on fair need and demand for higher eduhitting, steady fielding and excellent hustle cation in the feild of credit man-Charlie Dickerson, SAN, would nab the first base position on his over 500 hitting and errorless play afield. Sigma Kappa Chi's Bill Baker and Pi Alpha's Tom Skinner make this the closest race, because both were outstanding. Skinner would get the second spot on his fielding. Second base is almost a question mark. There was not an outstanding secondbaseman in the league. For this reason, I'm putting Mel Little, Alpha Epsilon Pi's third baseman, on second. Little, a steady fielder, is a good stick-man and a hustler. Shortstop is filled by Billy Parr, another Pi Alpha, who is one of the slickest fielders in the league. Pi Kappa Phi's Bit Eakin gets the runnerup spot here. Steve Pittard, Pi Alpha standout, is the pick at third. Pittard is a steady fielder, but gets the nod because of his hitting. Probably the most dangerous hitter in the league. Ken Webb, a Pi Alpha slugger who played only the last half of the season, gets the left field slot. Steady fielding and an excellent arm make Webb an easy choice. Sigma Kappa Chi's Charlie Ray who plays anywhere, is the centerfielder. He covers a lot of ground and is an excellent hitter. He also played shortstop and pitched for SKChi. Rightfield goes to Tau Epsilon Phi Charles Firestone, a steady fielder and hitter.

BEACON-Faye Dunbarn, 20 year old student here, is the Signal's choice for this week's "Beacon." Faye seems to agree with the recent bill which made Alaska the 49th state as she contemplates adding the new star to the flag. She is enrolled in the Business Administration College. Faye, whose hometown is Statesboro, says that her hobbies are "art, hunting, swimming, and tennis." As for future plans, she says her ambition is to be a career girl.

formal talks and dinner in the ant in the Army. He was station- Baptist Church, a as Jimmy Jones reached first on another error. Britton cadet dining hall. got Hill on a grounder to third

to end the inning.

THAT CONCLUDED the scoring until the top of the 10th. Black struck out for the fourth time as lead-off man. Pittard got his third hit of the day, stole second and came home on Webb's grounder that bounced over Powell's outstretched glove.

Huff again bore down and got Britton to ground to third to eave Webb on second, where he had advanced on the throw-in to he plate. Then came the heorics n the bottom of the inning by SAN.

Huff struck out 10 and walked live and kept the Pi Alpha's ofi balance enough to blank them in seven of the 10 innings. Blitton whiffed seven and issued only four walks, but was not as sharp as ie was in the first game.

FINAL NOTES: Powell, who vas shifted to third from shortstop, handled six assists and three outouts, one a nifty grab of a foul oop near the Pi Alpha bench... Parr made two clutch plays at shortstop for Pi Alpha. With two outs and a runner on third in the seventh, he went to shallow centerfield to save a run and also went behind third to cut off a sure hit and forced a runner at second to halt a rally in the sixth . Pittard was Pi Alpha's leading hitter with three for four and two cbi's. He prob hitter in the slammed three and knocked SAN's hitters would have be he had not sl first when it 1 right fielder towering blast got two scrat rbi. Incidenta

So, here are the IFC All-Stars as I see them:

Pitchers: V. A. Huff, SAN, and Bill Britton, PiA.

Catcher: Walter Fountain, PiA.

First Base: Charlie Dickerson, SAN.

Second base: Mel Little, AEPi.

Third base: Steve Pittard, PiA. Shortstop: Billy Parr, PiA.

Leftfield: Ken Webb, PiA

Centerfield: Charlie Ray, SKChi.

Rightfield: Charles Firestone, TEPhi.

Utility infielder: Bit Eakin PKPhi.

You might quarrel with me on some of the individual picks, but I'd like to have this team playing in the IFC league. I think I'd have a championship team. What do you think? And so, another intramural season becomes history.
